FOR PRESIDENT,

FOR VICE PRESIDENT,

RICHARD M. JOHNSON. EXTRACTS FROM THE REPORT OF THE

SECRETARY OF THE NAVY.

NAVY DEPARTMENT, 5 5th December, 1835.

To the President of the United States :

SIR--In presenting to your consideration the condition of our Navy for the past year, it affords me great satisfaction to state, that all the available means for its improvement have been successfully applied, and that its operations in protecting our commerce, although inadequate to the exigencies of that great and growing interest, have been highly honorable to the officers serving upon our naval stations, at home and abroad.

Since my report of the 29th of November, 1834, the ship of the line North Carolina has been thoroughly repaired in her hull, has been lately taken out of dock, and may be fitted for sea in eighty days.

The repairs of the ship of the line Independence, now in dock at Boston, have been commenced, and are progressing with great despatch. The frigates Constitution and Constellation have been equipped and sent to sea. The frigate United States has been prepared, and is ready for the reception of a crew. The hull of the frigate Columbia, at Washington, has been so nearly completed, under the law for the gradual improvement of the Navy, that she may be launched in the course of this month.

The sloops of war Peacock and Vandalia have been equipped and sent to sea. The stoop of war warren is taking in her crew, and will sail in a few Navy yards, or in waiting orders.

A national observatory, although not immediately nedays. The sloops of war Concord and Boston have been and the Lexington will be equally prepared in a few

The repairs of the sloops of war Falmouth and Natchez, and of the schooner Grampus, have been propitious for such an undertaking than the present. recently commenced, and it is believed that in a few weeks, they may be ready for the reception of their

The building of a store ship, authorized by a law of the 30th of June, 1834, has been commenced at Philadelphia; and a steam vessel has been commenced at New York, but will not be ready for service, until some

time in the summer of 1836. The ships of the line Alabama, Vermont, Virginia, Pennsylvania, and New York, and the frigates Santee, Cumberland, Sabine, Savannah, Raritan, and St. Lawrence, are on the stocks, well protected from the weather, and as nearly completed as it is proper they should be, until it is determined to launch them. * *

The ship of the line Delaware, the frigate Potomac, the sloop John Adams, and the schooner Shark, have been employed in the Mediterranean during the last pay has been increased by this act. * year. The frigate Constitution sailed for that station on the 19th of August last, from New York. The frigate United States returned from the Mediterranean on the 10th of December last. The Delaware is ordered to the United States, and is daily expected.

On the West India station, the sloops of war Van-dalia, St. Louis, and Falmouth, and the schooners Vandalia, after undergoing considerable repairs, sailed in the West India squadron. The frigate Constellation and that the public buildings upon it, which are of great is undergoing repairs, and will soon resume her station sailed for the West Indies on the 8th of October last, value, cannot be abandoned without serious loss. from Norfolk.

The Natchez has lately returned to Granite Stores, Commercial whf. the United States, having arrived at New York on the the United States, having arrived at New York on the 3d of October. The schooner Enterprise has been detached from that station, and ordered on a cruise to the East Indies. She sailed in company with the sloop East Indies. She sailed in company with the sloop in the 12th of July last—the Pearly 1919. Peacock, from Rio, on the 12th of July last-the Peacock having sailed from New York for that station on the 23d of April. The vessels which have been employed in the Pacific are, the frigate Brandywine, and sloops Furfield and Vincennes, and the schooners Dolphin and Grampus .-The Vincennes has been ordered home by the way of the East Indies, and the Fairfield has lately arrived at

The events of the last year furnish much additional evidence, that our naval force in commission, is not adequate to the protection of our rapidly increasing commerce. The frequent insurrections and revolutions in the governments of South America and of Mexico, endanger our merchant vessels upon the Atlantic as well as Pacific Ocean, and in the Gulf of Mexico, and even upon our own coast. Influenced by a knowledge of these circumstances, and in accordance with your suggestions, I have asked and obtained from the board of Navy Commissioners, an estimate of the increased annual expense of adding two frigates, three sloops of war, and four steam vessels, to our force now in commission, to be employed upon foreign stations, as well as upon our own coast. By their report, it appears that such an addition to our vessels in commission, would require annually an appropriation of four hundred and seventy-eight thousand dollars, but as not more than one steam vessel can be finished in the next year, the appropriation wanted for 1836 for this purpose, need not exceed four hundred and thirty-four thousand dollars. This sum is small, compared with the benefits that may be fairly calculated to result from its expenditure, in affording protection to our commerce, independently of the advantage to the efficiency and discipline of our navy, by calling into active service a large number of officers now unemployed. A large portion of the entire expenditure for the additional force proposed, must be incurred, even if it should not be called into service.

Appropriations for the gradual improvement of our navy yards, are next in importance to like appropriations for the gradual improvement of our navy. necessity of more ample means for protecting our shipping, as well as the immense amount of public property in the different yards, must be apparent to every one who is acquainted with the subject; and the expediency of increasing the facilities for constructing and repair-

ing our ships, is not less apparent. * A national foundry for the purpose of casting cannon, shot, and shells, as well for the army as the navy, congress at their late session, but was postponed in consequence of the shortness of the session, and the pressure of more urgent husiness. No doubt can be entertained of the importance of such an establishment, Soale by F. E. WHITE, 22 Long what.

when we consider the great improvements made in the fabrication of small arms at the different armories of the United States. In our future wars, especially on the MARTIN VAN BUREN. ocean, we must rely much upon the excellence of our

The importance of rearing a body of seamen, by enlisting into the service of our navy boys over the age of thirteen and under the age of eighteen, until they should arrive at the age of twenty one years, has already attracted the attention of Congress. At the last session, a bill for this purpose was introduced into the Senate. Every year the importance of this measure becomes more apparent. Able seamen are much wanted, while there are boys enough in our cities, leading lives of idleness and vice for want of employment, who, if thus enlisted, under judicious regulations, would in a few years afford us a sufficient corps of able seamen to man our navy, and in the meantime render services to their country worth their pay.

The compensation to be given by the pay bill to professors of mathematics, is such as to command the services of those who are every way competent to perform the duties of this station. A regulation is adopted to appoint none to the station who shall not receive a certificate of competency, after submitting to a rigid examination by scientific gentlemen, who shall be appointed for that purpose. This will be of great advan-

tage to the young officers. * * *

If provision should be made for the admission of a class of one hundred midshipmen at a time at the academy at West Point, to pursue such studies as should be prescribed by the Navy Department, and to be succeeded at the end of one or two years by another class, all in their turn might receive the advantage of this course of studies, highly necessary to their education as accomplished officers of the Navy, and at a small expense, as the midshipmen, while at the academy, would been equipped and sent to sea. The sloop of war receive no more pay than if attending the schools at the

prepared, and are ready for the reception of their crews, cessary to the defence of our country, is remotely so. It is hardly to be doubted that we shall, at some future period, make such an establishment; and I will venture to express an opinion, that no time can be more

Under the act concerning naval pensions and the navy pension fund, eighteen invalid pensions have been granted since my last report, making the number on the roll three hundred and five, and the annual amount required to pay them \$24,944; and 41 widows' pensions have been granted, making the number on the roll one hundred and fifty, and the annual amount necessary to pay them \$32,594. The annual charge, therefore, according to the present roll, will amount to \$57,538,

The act of 3d March, "to regulate the pay of the navy of the United States," and which increased the pay of many officers, is silent as to pensions. A difficulty arises in ascertaining the proper amount of pension to be allowed to widows of naval officers whose

The necessity of an explanatory act to obviate this difficulty is respectfully suggested.

In performance of my duty under the act of the 3d of March last, authorising the construction of a dry dock for the naval service, in the harbor of New York or its adjacent waters, I proceeded in May tast to the city of New York, where I was met by an able engi-Grampus and Experiment, have been employed. STENOGRAPHIC GLIMPSES OF CONGRESS.

Washington, December 18, 1835. Mr Secretary Woodbury gave a party and ball last night, brilliant with Northern stars, Southern comets. Western constellations, and meridional planets-to say were the members of Congress, officers of the Army and Navy, the Foreign Diplomacy, the Cabinet and

The House were engaged to-day, till nearly 5 o'clock, in a debate on various motions to dispose of a petition from the inhabitanis of Wrentham, Norfolk Co., head 80 winters had passed, applied to me to purchase Mass, for abolishing slavery in the District of Columbia, presented by Mr Jackson, of Mass.

None of the motions before the House were, strictly speaking, debatable - and yet, by tacit consent, the debate continued all day, and almost every view of the subject was taken.

As the House adjourned over till Monday, I shall endeavor to morrow to arrange a brief sketch of the desultory course of debate to-day-but it would be Impossible to confine it to space, unless I take time.

Mr Smith, of Maine, is confined to his chamber by a bilious attack-but he will be able to be abroad next week, I think.

A great Public Meeting in relation to the recent conflagration, was held in New York on Saturday, pursuant to a public invitation from the Mayor. Several resolutions were pa-sed; the most important is the following :--

"Resalved, That a committee consisting of the mayor and one hundred and twenty-five citizens be appointed to ascertain the extent and probable value of property destroyed, and how far the sufferers are protected by insurance Also, with power to make application to Congress for rel.ef by an extension of credit for debts due the United States, and a return or remission of duties on goods destroyed. And also, to ask such other aid from the general, state and city governments as may be deemed expedient. Also, to ascertain the origin and cause of the fire and what change, if any, should be made either in the regulating of streets, the erection of buildings, or the arrangements of the Fire Department, to prevent a recurrence of similar calamities, and to take such other measures as the emergency may demand."

The Committee of 125 subsequently held a meeting, and divided themselves into six select Committees, to examine and report upon the following branches of the main subject, viz-the extent and probable value of property destroyed, and how far the sufferers are protected by insurance—an application to Congress for an extension of credit on duty bonds and remission of duties and on such other aid as it may be expedient to ask of the General Governmentapplications to the State and City Governmentschange of the regulation of the streets-relief, with power to receive and distribute contributions, and also with power to increase their numbers :- the erection of buildings and the arrangement of the Fire

Mercantile Energy. - Notwithstanding the enormous loss of property which our merchants have sustained, we have not as yet heard of a single failure, or of a single dishonored note. There may, however, have been a few defalcations, as we have not had leisure to be very thorough in our enquiries. The amount must at any rate be very small The business of the Banks, and the great round of payments, goes on as if nothing had happened. The United States, North River, Bowery, City, and Greenwich Insurance Companies, will be able to pay all their losses by the late fire, and to continue the business of insurance, with a fair amount of capital. The Bowery Company has probably suffered less than any other-their loss amounting to but a few thousand dollars. The Equitable and East River Companies will pay all their losses. Most or all the others it is supposed, will be compelled to dissolve. - Ibid.

For the Boston Morning Post.

On Wednesday last, when the weather was cold enough to stiffen man and beast, a female, over whose a few cents worth of matches. Her history was full of misfortune, and she related it with humility. She was once the child of wealthy parents, and the wife of a respectable citizen; but, alas! how changed are her circumstances; she who once bestowed upon the poor rection, and me all the way from Dorchester, and come around her with a liberal hand, now asks from the public, and perhaps from those persons whom she has often relieved, a small pittance as the reward of her industry. She is too noble-minded to beg, and while she is blest with strength to go abroad and dispose of her little merchandize for a sustenance she will not claim from her fellow citizens a public support. Are there not many, very many, who are similarly circumstanced? If so, let every friend of humanity seek for such objects of suffering, and relieve them with an open hand. The dissipat on of the father should not debar the helpless child from our charity, or the industrious wife from our sympathy; nor should the indifference of a besotted mother excuse our charity, in permitting the fatherless child to suffer.

The Messrs Harper have sent forth another volume of their uniform edition of Bulwer's works, Pompeii, printed and bound in the same neat and beautiful style as Pelham and the Disowned, by which it was preceded. No honest man who has scanned the President's whole course from first to last, will venture to say, that he has seen any thing in it but an anxious desire to see the good faith and good feeling of the nations preserved. Every motive, whether centring in himself or expanding to embrace the great interests of the Union, to which his heart is devoted, all combine to make it almost the ruling passion with him, in closing his glorious and prosperous career as a public man, to close it with the serenity and mildness of an autumnal evening. His best hopes can only be answered, by leaving his country at peace with all the world. His greatest victory as a military man was the harbinger of peace-his greatest triumph as a civil magistrate would be, to coafirm the only conquest for which our happy Union should ever be tempted to take up arms; to maintain honorable and just and amicable relations with all the world-but not amity at the price of honor. BOSTON ACADEMY PENMANSHIP AND BOOK-KEEPING,

(Corner of Washington and West streets.) ESSRS. RICHARDSON & STRATTON, having asso To cated themselves in business, for the purpose of instruc-tion in Penmanship, Book Keeping and Arithmetic, beg leave to offer the citizens of Boston and the public generally a prospectus of the course PENMANSHIP.

Messes Richardson & Stratton, are both so well known to the Boston public, as teachers of Penmanship, and have taught that art with so much success in this city, that it will per-haps be unnecessary to say any thing further of their system haps be unnecessary to say any thing lattice of their system of instruction, the merits of which are so universally acknowledged. For the information, however, of persons who reside at a distance, and may be desirous of being taught the above branches, they beg leave to add, that the system is simple and natural, and will readily remove that stiffness of the arm and fingers which is so embarrassing, and which other professors have heretofore almost entirely failed to accomplish.

ROOKEK FERING

BOOK-KEEPING.

In the department of Book-Keeping, Messrs. R. & S. have had much personal experience, and have also derived valuable information from several eminent merchants of this city, which enables them to combine the elementary instructions of which enables them to common the tractical improvements of the merchant. They propose to initiate young gentlemen, who are about entering upon Commercial Business, not to teach merchants. They do not pretend to have made any new inventions or discoveries, but will, in all cases follow the most approved precedents of mercantile experience, and give their pusuch practice, as will enable them, when they arrive at Counting house, to transact business with precision and

Bear's tirease, for the growth of Hair—This article is procured from the animal in its mative climate, it being known to possess more vivilying proper ies when so procured, than when the animal is in a domesticated state. It is of the finest quality, and is sent out without any admixture, except a little perfume to keep it sweet—and for the growth of hair it is no doubt far superior to any thing hitherto known. Also for dressing the hair it is very pleasant and useful—cleansing the head from dandriff, and making the hair beautifully soft and glossy.

Athieropia Cueling Fluid, or Vergetable Hair Oil—for deep sent and ascultation—Bell on the Arteries—do on the Nerves glossy.

Atkinson's Curling Fluid, or Vegetable Hair Oil—for dressing the Hair This article has been very generally patronised for the last twenty years—and is considered an indispensable appendage to the toilet—it is a most excellent article for dressing the hair, making it, however, harsh, soft and glossy as silk—and keeping it in curl in exercise or damp weather.

THE subscriber has on hand a good assortment of the Swelled Beam Windlass Bedsteads, which, for comfort and convenience is undoubtedly the best article yet invented; its chief peculiarity is that of the Swelled Beam, the effect of which is to produce a crowning, and elastic sacking, and effectually provides against its saging. They are easily set up or taken down, and may be saved in case of fire as easily as any other piece of furniture, and from its mode of construction less liable to harbor insects than any other kind; but above all its advantages is the case and comfort obtained from the sacking, by means of its being made and kept elastic by means of the Swelled Beam, (the form of which is exhibited in the bove cut.)

to any depurative syrup with which I am acquainted. In the most obstinate and ambiguous deseases, it displays effects peculiarly surprising. In those affections that resist the skill of the physician, such as Rheumatism, Syphilis, Scrofula, Ulcerations, and Diseases of the Skin, &c., I would recommend it as worthy of great confidence.

JOHN D. GODMAN, M. D. For the last few years I have suffered excessively by a Biltious Mercurial Disease, which has rendered me frequently unfit for duty, and confined me as often to my berth. My diease was the sequela of bad treatment, while in the more tropical latitudes, and laboring under an acute inflamation of the liver, and other Billiary organs. Prior and pubsequently to our arrival in this port, I have had recourse to a great variety of prescriptions, medicines and nostrums—among which, were a number of bottles of Swaim's Panacea, Potter's Cathwere a number of bottles of Swaim's Panacea, Potter's Catholicon, the Rob of Laffecteur, &c., but without any benefit.—Dr Phelps being at that time a student of medicine in the University of Pennsylvania, advised me to make use of a newly discovered medicine, the Arcanum, which he believed would succeed in relieving me, in consequence of the very signal effects himself and others had observed in its operation in various glandular diseases, that were otherwise considered incurable. I commenced its use accordingly, and it affords me pleasure to state, that for several months past, not a vestige of the original or secondary disease has been discoverable. I prize the medicine above all others with which I have ever been acquainted. It is both pleasant and I believe certain it its effects, as a remedy in a variety of chronic diseases, incident to tropical and other climates.

Brig Pinchinea Philadelphia, Jan. 5, 1835. SAVANNAH, 6th March, 1831.

GENT.—I cannot refrain from expressing my gratitude to you in offering me a bottle of Dr Pheles' Arganum, as an experiment in my case of Rheumatism. I have been dreadfully afficted for upwards of twelve months, and for the last four or five months have scarcely been able to walk. I have used a dozen bottles of Swaim's Panacea, and found very tittle benefit from it. After taking the bottle of Arganum, I found such a change in my whole system, that I was induced to try another, and to my surprise, the pains in my legs all disappeared, and the Ulcers in one have completely healed up, and I can walk nearly as well as ever. I shall continue to take two bottles more, and firmly believe it will make a complete cure of my disease.

I remain, gentlemen, yours very respectfully, JNO, MORRALL. SAVANNAH, 6th March, 1831.

Extract of a letter from Dr Jones, a highly respectable physician, dated Baton Rogue, Louisiana, Dec. 28, 1833.—
The Arcanum had two powerful competitors, Swaim's Panacea, and Potter's Catholicon, which have been for years in circulation in this place. As far as I have had an opportunity of ascertaining its virtues, I believe the Arcanum to be superior to any article of the kind, yet offered to the public. I prescribed it in a case of Irritable Ulcer of three years standing, situated on the Malleolus Extrenus—the individual thus afflicted was much emaciated and debilitated,—after one week's attendance, I put him upon the Arcanum, following the directions three bottles nearly effected a cure of the ulcer and bodily health.

I prescribed it in several Mercurial and Syphilitic Affections, where it proved salutary. I am at this time trying the Arcanum on an individual, who has been laboring under Uicerous affections of one of his legs, for fifteen years,—he has taken I bottle only, and it has produced that effect, he is santaken I bottle only, and it has produced that effect, he is santaken I bottle only, and it has produced that effect, he is santaken I bottle only, and it has produced that effect, he is santaken I bottle only and I have been I aboring under Uicerous I have been I aboring under Uicerous I have been I aboring under Uicerous I have been I have been I have been I aboring under Uicerous I have been I h
